Sintetico richiamo al contesto: cosa è SolKE?

The **Assembly** is the overarching body that provides strategic guidance for networking activities.

The **Steering group** is the operational and coordination body ensuring that the Network's activities are coherent and complement each other.

The Subgroup on CAP Strategic offers a platform to:

- Contribute to improving the quality of the implementation of the CAP Strategic Plans;
- Identify common issues and opportunities in the implementation of various CAP Strategic Plan interventions and needs for EU CAP Network support (capacity building events and other means of support);
- Foster exchange of knowledge and good practices in the implementation of the CAP Strategic Plans;
- Provide input for the work programme of the EU CAP Network, in particular of the CAP Implementation Contact Point;
- Follow up the support provided by the EU CAP Network.

The Subgroup on Innovation and Knowledge Exchange (SolKE) offers a platform to:

- Identify common issues, good practices, and opportunities for peer-to-peer learning, related to training and advice, and to innovation and knowledge exchange | EIP-AGRI
- Support the implementation of the AKIS strategic approach, and facilitate networking and exchanges between AKIS actors, including transnational initiatives of Operational Group projects
- Provide input for the work programme of the EU CAP Network, in particular of the Support Facility for Innovation and Knowledge Exchange | EIP-AGRI.

Since October 2022, the Subgroup on Innovation and Knowledge Exchange (SolKE) has started its activities as part of the EU CAP Network.

Objectives

Docamex is a software for capitalizing on and mobilizing the know-how and experience of cheesemakers in the sector, enhancing their terroir.

Context: increase in the number of processing operators authorized in AOP Camembert de Normandie (dynamic in farm production) with the emergence of a need for technological support; problems with recruiting and retaining employees in cheese workshops (dairy makers, artisans, farmers) with a risk of loss of know-how (turn over, generation renewal)

Context

In diversi paesi europei ed extraeuropei si sta assistendo alla creazione di schemi di qualità con elevati standard di benessere animale con un duplice obiettivo:

- creare un efficiente sistema di impresa capace di dar luogo a una produzione sostenibile in termini economici, sociali e ambientali;
- rassicurare i consumatori e la società civile in relazione a motivazioni di scelta legate al rispetto degli animali allevati.

Una leva commerciale importante consiste nella creazione di un ulteriore valore aggiunto a prodotti già ben collocati sul mercato e anche già tutelati, legando il processo produttivo a elementi referenziali che possano attirare l'attenzione del consumatore, specialmente per quanto concerne le modalità d'allevamento degli animali.

Sulla base di queste premesse è facile capire come l'intera filiera di una DOP come quella del Prosciutto di Parma sia interessata ad approfondire queste tematiche. Lavorare cosce provenienti da suini allevati con standard elevati di benessere animale/biosicurezza e con un utilizzo responsabile del farmaco sta diventando una delle principali sfide che il Consorzio del Prosciutto di Parma vuole affrontare in tempi brevi. Mettere a disposizione di singole filiere suinicole un sistema di certificazione con disciplinare tecnico basato su protocolli scientifici con alti standard è al centro di questa strategia finalizzata a raggiungere mercati particolarmente sensibili a queste tematiche e ad aderire a disciplinari stranieri
